

KOVA — Executive Summary

[COMPANY LEGAL NAME] · Confidential · [DATE]
Contact: [FOUNDER 1 NAME] · [FOUNDER EMAIL] · [FOUNDER PHONE]

Company

KOVA (Kova Agent) is a **Business Intelligence Operating System (BIOS)** for African small and medium enterprises. The platform replaces a digital marketing department — content strategy, creation, publishing, engagement, analytics, lead capture, email marketing, and strategic planning — with **six autonomous AI agents** operating 24/7.

- **Incorporation:** [COMPANY LEGAL NAME], [JURISDICTION: Kenya] (registration in progress / [COMPANY REGISTRATION NUMBER])
- **Product status:** Live in production on Railway — not a prototype
- **Payments:** M-Pesa (Kenya) + Stripe (international)
- **Channels:** Nine social platforms + WhatsApp Business + REACH conversion tools

Problem

There are **44 million MSMEs** in Africa. Social media is their primary storefront, yet fewer than **8%** maintain consistent presence.

Barrier	Reality
Time	3–5 hours/day for effective social management
Cost	Social managers cost KES 30,000–50,000/month; Western tools start at \$25–249/month
Fragmentation	4–6 tools for content, analytics, leads, and email
No conversion path	Followers rarely become measurable leads or sales

Western tools solve scheduling or copywriting — not the **full intelligence loop** (research → create → publish → engage → capture → nurture → learn). None are built for **M-Pesa, KES pricing, and mobile-first Africa**.

Solution

KOVA runs six AI agents in a continuous loop:

Agent	Role
Create	Platform-native content from business ideas

Analyst	Content DNA, engagement prediction, learning
Research	Trend discovery and opportunity briefs
Adapt	Optimal scheduling from 30-day performance data
Engage	Sentiment, replies, superfans, auto-response
Chief Strategist	Orchestration, Daily Brief, proactive seeds

Conversion engine: Kova Links (link-in-bio), lead capture forms, CRM-light pipeline, email marketing, Smart CTAs, A/B testing.

Built and live: 16 Django app modules, 12+ Celery background tasks, Growth Partner Program, multi-brand teams, content safety, platform resilience (3-strike recovery).

Market

Metric	Value
African MSMEs	44M+
TAM (social + marketing SaaS)	~\$4.6B
Beachhead	Kenya SMEs, agencies, campus commerce, NGOs
Expansion	Nigeria, South Africa (post-Kenya PMF)

Competitive position: AI-native BIOS at African price points with local payments — not a Western scheduler with a discount.

Business model (Plan v2)

Tier	KES/mo	USD/mo	Target user
Starter (Jipange)	499	4	Solo entrepreneurs, trial conversion
Growth (Kazi)	1,499	11	Growing SMEs — mass market
Pro (Biashara)	2,999	22	Established businesses, WhatsApp Business
Agency (Wakala)	7,999	59	Agencies, multi-brand (approval required)

- **7-day trial** with Starter-tier limits

- **Secondary revenue:** Growth Partner commissions (15–30%), future agency white-label
- **Blended ARPU target (Year 1):** Growth-tier weighted (~KES 1,200–1,500/month at scale)

Traction & proof

Signal	Status
Production platform	Live — Railway Web, Worker, Beat, Redis, PostgreSQL
Platform integrations	9 social networks; Facebook/Instagram publishing verified
Pilot design	14 TEST_BUSINESSES across e-commerce, SaaS, food, real estate, NGO, agency, fintech, education — full end-to-end QA plan
Founder dogfood	Unimart Africa (campus e-commerce) — first real customer narrative
Legal pages	Privacy, Terms, Cookies, AUP, DPA deployed
Current burn	~KES 3,500–4,500/month infrastructure (pre-scale)

Estimated sweat-equity build value: USD 159,000–245,000 (agency-equivalent). **Investment funds growth, not greenfield build.**

Go-to-market

1. **Founder-led sales** — Nairobi SME networks, university incubators, Mastercard Foundation ecosystem
2. **14-business pilot** — Structured onboarding from TEST_BUSINESSES playbook; case studies and LOIs
3. **Growth Partner Program** — Referral commissions, milestones, profit share (built)
4. **WhatsApp-first** — Marketing conversations on Pro/Agency tiers; SME-native channel
5. **Content + demo** — Live product demo; Daily Brief as retention hook

See docs/FIRST_50_CUSTOMERS_PLAYBOOK.md for first-50 execution detail.

Financial ask

Item	Detail
Round	Seed
Target	USD 150,000–300,000 (ideal baseline ~USD 200,000)

Instrument	[SAFE / Priced equity / Convertible note — TBD with counsel]
Runway	12–18 months
Use	Team (40%), GTM & partners (25%), LLM/API (15%), infra & legal (10%), buffer (10%)
Milestone	1,000 paying users in Kenya; grant-ready impact narrative in parallel

Detailed allocation: KOVA_Use_of_Funds.md, docs/KOVA_FUNDING_PLAN.md.

Team

Role	Name	Notes
Founder & CEO	Iranzi Innocent	Built full platform; USIU-Africa; Mastercard Foundation Scholar; operator of Unimart Africa
[FOUNDER 2 NAME]	[ROLE]	[EQUITY %] — [if applicable]
Hiring (post-close)	Growth Lead, Customer Success	See funding plan hiring table

Impact (SDG alignment)

- **SDG 8:** Decent work — MSME revenue growth, partner income via Growth Partners
- **SDG 9:** Industry & innovation — locally built AI infrastructure
- **SDG 10:** Reduced inequality — tools priced for African budgets (from KES 499/month)

Risks (summary)

Risk	Mitigation
Social API policy changes	Provider abstraction; 9-platform diversification; resilience layer
AI content quality	Human-in-the-loop; content safety; brand voice guardrails
Payment/regulatory	M-Pesa go-live checklist; ODPC registration path; advocate-reviewed policies
Founder bandwidth	Seed hires + partner channel

Next steps for investors

1. Review one-pager and pitch deck (05-fundraising/)
 2. Product demo — [DEMO URL]
 3. Sign mutual NDA (02-legal/KOVA_Mutual_NDA_TEMPLATE.md) for detailed financials
 4. Data room access per KOVA_Data_Room_Index.md
