Format: One section = one slide · Export to PDF via fundraising/scripts/build_pdfs.py
Presenter: [FOUNDER 1 NAME] · **Duration:** 12–15 minutes · **[DATE]**

Slide 1 — Title

KOVA
Business Intelligence Operating System for African SMEs

- [COMPANY LEGAL NAME] · Nairobi, Kenya
- [FOUNDER 1 NAME], Founder & CEO
- Seed round · [DATE]

Slide 2 — The hook

- **44 million** African MSMEs — social is their storefront
- **<8%** post consistently
- **Not a time problem alone — a systems problem**
- *"We make your digital marketing department run itself."*

Slide 3 — Founder story (why now)

- Built **Unimart Africa** (campus e-commerce) — product worked, growth stalled
- Could not keep up with **5 platforms** while running everything else
- If a coding founder cannot solve it → **millions of SMEs have no chance**
- Built KOVA from lived pain, not a market report

Slide 4 — Problem

Pain	Cost of status quo
Time	3–5 hours/day
People	KES 30K–50K/mo for a social manager
Tools	\$25–249/mo Western stack, no M-Pesa
Conversion	Followers ≠ customers

Gap: No AI-native **full loop** at African economics

Slide 5 — Solution

KOVA BIOS — six AI agents, one platform:

- 1. Research trends
- 2. Create platform-native content
- 3. Predict & learn (Content DNA)
- 4. Schedule & publish (9 platforms)
- 5. Engage & reply
- 6. Strategist orchestrates + **Daily Brief**

 - Show: M-Pesa checkout, multi-brand, partner dashboard
 - *"This is production — Railway, Celery, PostgreSQL — not Figma."*
-

Slide 7 — How it works (loop)

Idea (3 min) → Create → Analyst → Adapt → Publish
→ Engage → Leads → Email → Learn → Repeat

- Human-in-the-loop by default
 - Auto-approve available on experienced tiers
 - **REACH:** measurable CTAs on every post
-
