

KOVA — Fundraising & Legal Drafts

Version: 1.0 · June 2026

Status: Drafts for founder review — not executed legal documents

Disclaimer

These materials are **drafts for discussion only**. They are **not legal, tax, or investment advice**. All contracts, filings, and investor communications must be reviewed by qualified **Kenyan advocate**, CPA, and investor counsel before signing or distribution.

Folder structure

Folder	Contents
01-corporate/	Incorporation placeholders (CR12, resolutions) — populate after BRS registration
02-legal/	Founders agreement, IP assignment, NDA templates; policy drafts
03-financial/	Cap table template, financial projections template
04-commercial/	Pricing reference (Plan v2) — see docs/PLAN_V2_SPEC.md
05-fundraising/	Executive summary, one-pager, pitch deck, investor FAQ, use of funds, data room index
06-grants/	Grant impact narrative template
pdf/	Generated PDFs (mirror of markdown sources)
scripts/	PDF build tooling

Tier 1 documents (draft complete)

Document	Path
Executive Summary	05-fundraising/KOVA_Executive_Summary.md
One-Pager	05-fundraising/KOVA_One_Pager.md
Pitch Deck (slides)	05-fundraising/KOVA_Pitch_Deck.md
Investor FAQ	05-fundraising/KOVA_Investor_FAQ.md

Use of Funds	05-fundraising/KOVA_Use_of_Funds.md
Data Room Index	05-fundraising/KOVA_Data_Room_Index.md
Founders Agreement (template)	02-legal/KOVA_Founders_Agreement_TEMPLATE.md
IP Assignment (template)	02-legal/KOVA_IP_Assignment_TEMPLATE.md
Mutual NDA (template)	02-legal/KOVA_Mutual_NDA_TEMPLATE.md
Cap Table (template)	03-financial/KOVA_Cap_Table_TEMPLATE.csv

Pricing source of truth (Plan v2)

All fundraising drafts use **Plan v2** pricing (May 2026):

Tier	KES/mo	USD/mo
Starter (Jipange)	499	4
Growth (Kazi)	1,499	11
Pro (Biashara)	2,999	22
Agency (Wakala)	7,999	59

Authoritative spec: docs/PLAN_V2_SPEC.md, apps/billing/models.py.

How to regenerate PDFs

From the repository root (kova_agent/):

```
pip install markdown weasyprint
python fundraising/scripts/build_pdfs.py
```

Fallbacks (script tries in order):

1. **WeasyPrint** — pip install markdown weasyprint (requires GTK on Windows)
2. **Pandoc** — pandoc input.md -o output.pdf
3. **mdpdf** — pip install mdpdf
4. **xhtml2pdf** — pip install markdown xhtml2pdf (works on Windows without GTK)

PDFs are written to fundraising/pdf/ with the same relative paths as source .md files (CSV sources are skipped).

On Windows PowerShell:

```
python fundraising/scripts/build_pdfs.py
```

Marketing brochures (SMB / demo handouts)

Print-ready HTML + PDF: [../marketing/brochures/](#) — regenerate with `python marketing/brochures/scripts/build_brochure_pdfs.py`.
