Title of Software:

Kova – AI Business Growth Platform

SOFTWARE INFORMATION

Category of software:

☐ ☒ Computer ☐ ☒ Mobile ☐ ☒ Databases ☐ Others ... Cloud-based Software-as-a-Service (SaaS)

Abstract/Brief description of software: *(Give a brief description of the Software and the purpose for which it may be used.)*

Kova is an artificial intelligence-powered business growth platform designed to help businesses improve their digital presence, customer engagement, marketing activities, and commercial performance through intelligent automation.

The software provides businesses with a unified environment for managing marketing, customer interactions, commerce, and business support while simplifying everyday operations through conversational and web-based interfaces.

Kova is intended for use by small and medium-sized enterprises, entrepreneurs, professionals, agencies, and organizations seeking accessible AI-powered business assistance without requiring extensive technical expertise

Novelty:

a) List the novel and unique features of the Software:

The software introduces several innovative capabilities, including:

- Integration of multiple business support functions within a single AI-powered platform.
- Intelligent assistance for marketing, customer engagement, and commerce.
- Conversational interaction that simplifies business management.
- Adaptive recommendations based on business activity and user interactions.
- Modular architecture designed to support continuous enhancement and integration with external business services.

b) Describe the Software in detail (Consider the commercial applications of the technology and how they might be applied to a product, process, or service. *Importantly, please describe what aspects of the inventions have been proven experimentally and what is shown by the data. Also, describe what materials or prototypes have been created in relation to the invention. Attach any technical documents of Invention, including (submitted or draft) manuscripts, posters, theses, and grant applications.*)

Kova is a cloud-based software platform that combines artificial intelligence with business management capabilities to assist organizations in improving efficiency and business growth.

The software provides tools that support marketing activities, customer engagement, commerce management, and operational decision support within a unified environment.

A functional prototype has been developed and tested to demonstrate the feasibility of the software.

The prototype includes user authentication, business onboarding, AI-assisted content generation, commerce functionality, workflow automation, and communication features.

The software is intended for commercialization as a Software-as-a-Service (SaaS) platform and may be applied across various industries including retail, professional services, hospitality, education, healthcare, and digital commerce.

Supporting technical documentation and prototype demonstrations are available where appropriate

Stage of development: Tick where appropriate

☐ ☒ Concept ☐ ☒ Prototype ☐ ☒ Pilot/Beta test ☐ Ready to license

Keywords: (Provide at least five keywords that accurately describe the scope of the Software)

Artificial Intelligence, Business Management, Marketing Automation, Business Growth, Commerce, Cloud Computing, Software-as-a-Service, Digital Marketing, Customer Engagement, Business Intelligence

State of software documentation: Tick where appropriate

☐ None ☐ ☒ Partial ☐ Full		
Marketplace for the Mobile App: Tick where appropriate ☐ ☒ Apple App Store ☐ ☒ Google Play ☐ Microsoft Store ☐ ☒ Others		
Indicate the kind of license you plan to use for the release of the Software ☐ Academic ☐ Evaluation ☐ End User ☐ Open Source ☐ ☒ Commercial		
State the format in which the software will be made available ☐ Source ☐ ☒ Executable ☐ Object ☐ Others		
SOFTWARE DEVELOPMENT		
History of the Software		
Event	Date	Comment
When was it first conceived?	30/11/2026	Initial concept developed
When was it first created?	5/1/2026	Research notes and design documentation
When was it first published?		
Third Party Code and Materials		
Provide a list of all third-party code or Materials embedded in, accessed by, or otherwise used in the Software, along with all associated license, consulting, or use restriction agreements. Please include all open source, public domain, library, and other executable or source code: 1. 2.		
Name of third-party Code or Material	Webpage to Download, if any	License Agreement (link, if any)
Disclosures, Publications, and Verbal/Oral Presentations (Past or Future)		
List disclosures, publications, or disseminations of any aspect of the Software.		
Description/Type	Date (or Expected Date)	Comments
NA	NA	NA
Prior Art: State publications, patents, systems, or any disclosure that you are aware of that are similar to the disclosed Software. 1.		

2.
